

## PRESS RELEASE

To be released immediately

15 March 2017

### INTHERWASTE 1<sup>st</sup> Thematic Seminar on 'Waste Deposit in Heritage areas'

On 9<sup>th</sup> March 2017, the Municipality of Porto organised the 1<sup>st</sup> Thematic Seminar of the INTHERWASTE project. During the event, focusing on 'Waste Deposit in Heritage areas', several best practices from partners and invited guest were presented.

This seminar gathered the project partners as well as local and regional stakeholders coming from the partners' countries. As advisory partner, ACR+ had therefore a key role in the discussions. The topic of 'waste deposit' was chosen to discuss different types of waste collection areas and devices. For instance the installation of eco-points and underground waste containers which both have to be carefully thought in order to be easily accessed by collectors and citizens alike, avoid to damage the visual aesthetic and protected zones, both on the ground and underground.

During the opening ceremony, the Municipality of Porto presented the waste management in the city and the major changes that were undertaken in the last years. Porto has been a Heritage City for over 20 years and has therefore some experience in dealing with waste in specific areas.

Following this introduction, the project partner cities showcased a selection of best practices on waste deposit from their own heritage areas. An invited guest also presented two cases from the Heritage City of Florence. These cities are all Heritage Cities and have many similarities in this regard, but they also have specific characteristics which mean that all solutions cannot be implemented in the same way. This panel of best practices was therefore a very efficient way for each to discover a combination of solutions that allowed cities to discuss the most suitable solutions for their own environment. This led to fruitful discussion amongst the participants regarding the introduction of such methods within their territories.

Additionally, this seminar was a good opportunity to introduce the newly produced [INTHERWASTE video](#) which is an excellent mean of communication to present the project to external stakeholders. More [communication material](#), including posters and brochures in various languages, can also be found on the project's website.

All presentations will soon be available on the INTHERWASTE website: [www.interregeurope.eu/intherwaste](http://www.interregeurope.eu/intherwaste). More information will also be given in the next newsletter, to which you can subscribe [here](#).

#### Next seminar

The next thematic seminar will be held in **Krakov on 7-8 June 2017** and will focus on "Selective Collection in Heritage Cities". These seminars are part of the first step of the project aiming to learn and exchanges best practices and policies.
