• IMPROVING MONITORING
FOR DECISION MAKING

PROPOSITION

Collaborative work to improve (regional) waste monitoring to better guide decision-making

SOME POSSIBLE TOPICS

Improve the monitoring of **waste strategies**

- **Accelerate** data collection and processing
- Develop a **governance** for a collaborative observation
- Improve the **interpretation** of evolutions and **assessment** of instruments
- meet the data needs of different levels of governance : local, regional, national, european

Fill the current **gaps**

- **Traceability** and recycling rates
- Prevention and re-use
- Costs
- ...

Open up to **circular economy indicators**

- Consumption-based indicators
- Connection between waste and material consumption

Improve / streamline **inter-regional comparisons**

- Streamline benchmarking for setting targets
- Ease the publication of cross-analysis of regional waste data and policies
- Capitalize on feedback experience
- Capitalize on feedback experience
