

# COLLABORATIVE AND CIRCULAR FOOD SYSTEMS TO REDUCE POLLUTION AND IMPROVE HEALTH

27 May 2021

## EU GREEN WEEK 2021 PARTNER EVENT

Collaborative and circular food systems can significantly reduce pollution of the environment, in particular by addressing food waste along the agri-food value chain, and can at the same time improve health of consumers and increase the resilience of local economies and communities. This event will present the innovative approaches of 5 European projects working in synergies (CO-FRESH, FAIRCHAIN, FOODRUS, LOWINFOOD, PLOUTOS) and an expert panel will address issues related to the sustainability of food systems at local and regional level.

- 12:00 Introduction
- 12:10 The Farm 2 Fork strategy's contribution to sustainable food systems (Luis Vivas-Alegre, European Commission)
- 12:20 Sister project presentation: CO-FRESH, FAIRCHAIN, FOODRUS, LOWINFOOD, PLOUTOS
- 13:00 Panel discussion on the sustainability of food systems at local and regional level (Sister projects, European Commission, FAO tbc)
- 13:20 Q&A session
- 13:25 Conclusions & key messages to take home
