VERC : Virtual European Recycling Center

Objective : provides services to all recycling actors throughout Europe mainly using the most recent advances in Information and Communication Technologies. These services would lead to higher competitiveness of European Recycling Industry, more transparency in secondary materials exchanges and increasing recycling rations to reach the targets of actual and emerging legislation.

Duration : 36 months from August 2002

European financial support: 2.080.451 Euros (100%)

Programme : Competitive and Sustainable Growth (1998-2002) – DG Research

Co-ordinator: Fundacion GAIKER, Spain

Partners:

IPTS	Institute of Prospective and Technological Studies	European Commission – Joint Research Center
