

“Optimal Recovery of material and energy resources: the cases of the rest fraction of municipal waste and sewage sludge”

Report based on the International Experts Seminar
Prepared by Hara Xirou, ACR+ Secretariat

16-17 June 2010, Seville, Spain

ALL PRESENTATIONS FROM THE INTERNATIONAL EXPERTS SEMINAR ARE AVAILABLE

ON THE ACR+ WEBSITE: <http://www.acrplus.org/Seminar-Sevilla-2010>

Table of Contents

1. Introduction	3
Objectives and format of the seminar	3
1.1. Waste Policy at European Level.....	4
1.2 Waste co-processing towards a legal EU recognition.....	9
2. CO ₂ , Energy and material balance of waste treatment alternatives	11
2.1 Technology Innovation in the Cement Industry & the SET-Plan	11
2.2 LCA of integrated Waste Management Systems	13
2.3 Energy and CO ₂ balance of sewage sludge treatment.....	16
3. Sewage Sludge Treatment:	18
Case studies from different European countries.....	18
Case Study 1: Sewage Sludge management in Hungary.....	18
Case Study 2: Sewage Sludge treatment in Spain and recommendations on the Sewage Sludge Directive	20
Case Study 3: Sewage sludge composting in Odense, Denmark	22
Case Study 4: Pre-processing and Co-processing of Sewage Sludge, Holcim.....	23
4. The residual fraction of municipal solid waste:.....	25
Case studies from different European countries.....	25
Case study 5: Residual Fraction of MSW, usage of Stabilat [®] in Lägerdorf cement plant, Germany.....	26
Case Study 6: ECOREC, rest fraction of MSW in Sofia, Bulgaria	27
Case Study 7: the rest fraction of municipal waste in the Province of Cordoba, Spain	29
5. Conclusions	30
